# MINUTES OF MEETING MTA CAPITAL PROGRAM OVERSIGHT COMMITTEE

July 22, 2020 New York, New York 10:00 A.M.

Because of the ongoing COVID-19 public health crisis, the MTA Chairman convened a one-day, virtual Board and Committee meeting session on July 22, 2020, which included the following committees:

- Long Island Rail Road and Metro-North Railroad;
- New York City Transit;
- MTA Bridges and Tunnels;
- Finance;
- Safety;
- Audit;
- Corporate Governance; and
- Capital Program Oversight Committee.

To see a summary of the CPOC Committee meeting, please refer to the July 22, 2020 Board minutes in the September Board Book available here on the Board materials website:

https://new.mta.info/transparency/board-and-committee-meetings/september-2020

# MTA Capital Program Commitments & Completions

through August 31, 2020

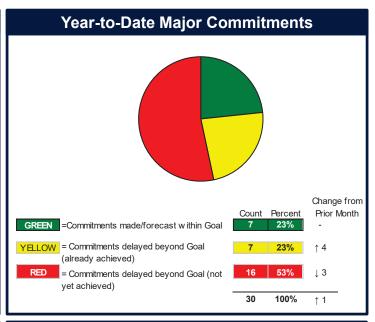

#### **Capital Projects – Major Commitments – August 2020**

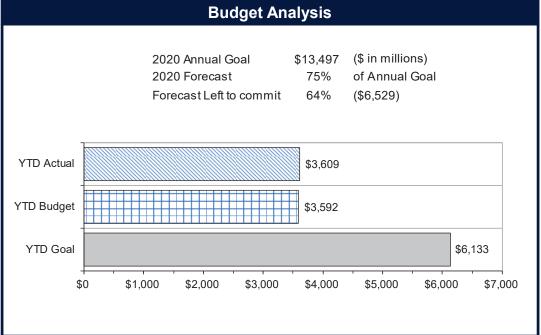

In 2020, agencies have a goal of \$13.5 billion in overall commitments. 50 major commitments are included; 28 for NYCT, eleven for LIRR, four for MNR, one for B&T, four for Network Expansion, and two for MTA Bus.

The MTA's Chairman Pat Foye announced at the March 25th Board meeting that capital work commitments will be considered on an exception basis. This action has impacted commitments since then. As a result, the MTA's \$13.5 billion 2020 commitment plan is under review.

Through August, agencies have committed \$3.6 billion versus a \$6.1 billion YTD goal. The shortfall is mainly due to slips of sixteen major commitments pursuant to the moratorium on new commitments announced by the MTA Chairman. The sixteen major slips are explained on the following pages.

Since the last report to the MTA Board in July 2020, the year end 2020 forecast has slipped from 89% to 75%, which reflects the anticipated movement of \$3.1 billion of major commitments into 2021 and 2022.

#### **Capital Projects – Major Completions – August 2020**

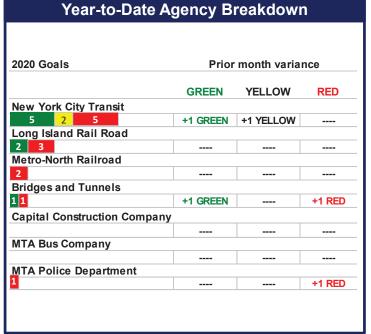

In 2020, agencies have a goal of \$5.4 billion in overall completions. 40 major completions are included, including 19 for NYCT, eight for the LIRR, seven for MNR, four for B&T, one for Network Expansion, and one for MTA PD.

Through August, agencies have completed \$1.2 billion versus a \$2 billion YTD goal. The shortfall is primarily due to slips of twelve major completions explained on the following page.

Although the pace of work slowed for some projects already under construction, the MTA still anticipates meeting 97% of its overall completions goal in 2020. This relies on achieving \$3.5 billion of completions in the 4<sup>th</sup> quarter 2020.

#### 2<sup>nd</sup> Quarter 2020 Traffic Light Report on MTA Core Capital Program Projects

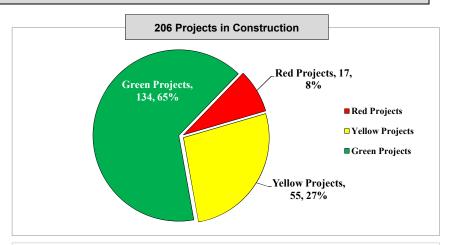

#### A total of 230 Projects were Reviewed for the 2nd Quarter 2020

**Projects in Design:** 24 projects were reviewed in the design phase with 8 (33%) projects designated green, 6 (25%) yellow, and 10 (42%) red. This is an increase of 1 red project from the 1<sup>st</sup> quarter 2020. Of the 10 red projects, 9 were red for a schedule variance and 1 was for a contingency variance. The schedule variances were due in part to coordination with other agencies, required revisions to the design documents to comply with updated codes, repackaging of projects into Design-Build bundles, and increased scope.

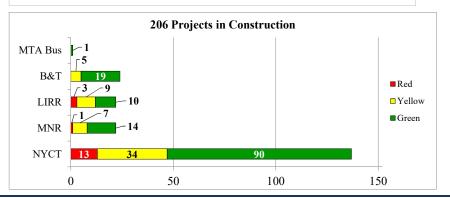

**Last Quarter:** 29 projects were reviewed in the design phase with 10 (34%) projects designated green, 10 (35%) yellow, and 9 (31%) red.

**Projects in Construction:** 206 projects were reviewed in the construction phase with 134 (65%) designated green, 55 (27%) yellow and 17 (8%) red. This is a increase of 2 red projects since the 1st quarter 2020. Of the 18 red projects, 11 (65%) were red for a schedule variance, 5 for a contingency variance, and 1 for both contingency and schedule variances. For the 11 projects designated red for schedule, the variances ranged from 3 to 9 months. The schedule variances were due in part to Covid-19 related manpower issues, Covid-19 travel restrictions, equipment delays, subcontractor delays, lack of General Orders, and unforeseen site conditions requiring attention.

**Last Quarter:** 207 projects were reviewed in the construction phase with 138 (67%) designated green, 53 (26%) yellow and 15 (7%) red.

# Terms and Definitions 2<sup>nd</sup> Quarter 2020 Traffic Light Report on MTA Core Capital Program Projects

The following Terms and Definitions are used to identify a project's Traffic Light color designation using variances from quarter to quarter and are based on three performance indicators: cost, contingency and schedule. A project is designated a "<u>red light project</u>" when one or more of the three indicators exceed a specified threshold. Agencies are required to produce follow-up variance reports for all qualified red light projects. Included in these reports are one-page agency summaries (on pink paper stock) of issues associated with each project showing a <u>red</u> indicator and how the issues are being resolved. A project is designated a "<u>yellow light project</u>" after one or more performance indicators had triggered a red in a previous quarter. A yellow project may revert back to green after four consecutive quarters if the performance indicators have not worsened. A project is designated a "<u>green light project</u>" when no performance indicator has exceeded the Traffic Light Reports specified thresholds.

#### **Traffic Light Report Project Terms and Definitions**

#### **Projects in Design: 24**

- Green: Indices less than 110% and index movement of less than 10%.
- Red: Cost or Contingency Index: An EAC increase of 10% (or index movement of 10% or more since last Traffic Light Report).
- Red: Schedule Variance: An increase of 3 months or more to substantial completion since last Traffic Light Report.
- Yellow: Previously indicated as **red** with no new substantial change since last Traffic Light Report / A project in design that has been designated Yellow may be returned to Green when it has been in compliance with the three performance indicators for (four consecutive quarters) one year.

#### **Projects in Construction: 206**

- Green: Indices less than 110% and index movement of less than 10%. Other
- indices not exceeding those criteria specified in index formulas and criteria.
- Red: Cost or Contingency Index: An increase of 10% (or index movement of 10% or more since last Traffic Light Report).
- Red: Schedule Variance: An increase of 3 months or more to substantial completion since last Traffic Light Report.
- Yellow: Previously indicated as **red** with no new substantial change since last Traffic Light Report / A project in construction that has been designated Yellow may be returned to Green when it has been in compliance with the three performance indicators for (four consecutive quarters) one year.

#### **Report Index Formulas and Criteria:**

- Cost Index = Total Project EAC / Current Approved Budget (Note: Current Budget is not Budget at Award)
- Schedule Variance = Number of months of change in schedule since last Traffic Light Report
- Contingency Index = % Contingency used / % 3rd Party Contract Completion (contingency used includes expended & pending AWOs). Triggered when project has reached 25% or higher. Threshold for NYCT is \$15M or more, other agencies \$7M or more.
- Excludes projects in CPOC's Risk-Based Monitoring Program listed at end of report

Report Index Formulas and Crite
---------------------------------

> Only projects with budgets of \$7M or greater are included in the report

- = Index increase: Trending indicates condition worsening since last quarterly report
- ▼ = Index decrease: Trending indicates condition improving since last quarterly report
- = No Change since last quarterly report

#### **Summary of Core Traffic Light Report Design Exceptions**

(Second Quarter 2020 - As of June 30, 2020)

ACEP	Project Name	Index Trigger	EAC	Design Completion Date	Reason for Variance Since Last Quarterly Report	What is Being Done	IEC Comment: All Agency Contractor Evaluation
					NYCT - New York City Transit		
T7041314	ADA: Court Square - Crosstown Line (Elevator Phase)	Schedule	\$25.7M	Jul 2020	During the Second Quarter 2020, the forecasted Design Completion slipped three months, from April 2020 to July 2020. This was because the project was converted from a design-bid-build delivery method to a design-build. The design documents were combined with the Jamaica Bundle earlier this year, which delayed the Request for Proposal (RFP) documents necessary for procurement purposes.	documents were completed and authorized for procurement, as of July 10th. NYCT is in the process of assigning project personnel to further the project in	An Agency ACE evaluation is not required for this
T7041322	ADA: 95th Street - 4th Ave Line	Schedule	\$50.0M	Sept 2020	During the Second Quarter 2020, the forecasted Design Completion slipped six months, from March 2020 to September 2020. This was due to revisions to the design documents after review by NYCT, the change of project funding from State to Federal, completion of design revisions to comply with the New York State 2020 Design Code effective May 2020, and pending Project Requirement and Design Criteria (PRDC) integration.	The consultant has been provided a revised task order to address the changes described except for the PRDC	0 ,
T7041330	ADA: 14th Street - 6th Ave/7th Ave Complex	Schedule	\$41.4M	Aug 2020	During the Second Quarter 2020, the forecasted Design Completion slipped six months, from February 2020 to August 2020. This was due to the expansion of the project scope with the addition of other bundled contracts. The additional contracts included are A-37342, A-37345, A-37111, C-48719 and MW24-8924.	Design is currently ongoing; subsequent to the reporting period design completion has been pushed back to October 2020	5 ,
T7041347	ADA: 14th Street - 6th Ave Line	Schedule	\$43.7M	Aug 2020	During the Second Quarter 2020, the forecasted Design Completion slipped six months, from February 2020 to August 2020. This was due to the expansion of the project scope with the addition of other bundled contracts. The additional contracts included are A-37342, A-37345, A-37111, C-48719 and MW24-8924.	Design is currently ongoing; subsequent to the reporting period design completion has been pushed back to October 2020	5 ,
T7041348	ADA: 14th Street - Broadway / 7th Ave Line	Schedule	\$55.6M	Aug 2020	During the Second Quarter 2020, the forecasted Design Completion slipped six months, from February 2020 to August 2020. This was due to extensive negotiations between NYCT and the prospective bidder.	Subsequent to the reporting period, the contract was	An Agency ACE evaluation is not required for this project
T7160727	Roof Replacement: Tiffany Central Warehouse	Schedule	\$18.6M	Aug 2020	During the Second Quarter 2020, the forecasted design completion slipped four months, from April 2020 to August 2020. This delay was due to the Capital Program PAUSE by the Governor that has delayed the advertisement and bidding phase.	The situation regarding the Capital Program PAUSE	The overall Contractor/Consultant Performance rating for the current All-Agency Contractor Evaluation (ACE) report for this project is consistent with the IEC's observation of project performance, during this reporting period.
MNR - Metro-North Railroad							
M7020301	Strategic Facilities - Croton Falls Parking Lot	Contingency	\$14.0M	Oct 2020	During the Second Quarter 2020, the Strategic Facilities project had a high Contingency Index due to the need for the design consultant to provide resident engineering and construction inspection services. This is because of a sudden reduction in staff, in MNR's Construction Management Department, and an increased number of projects to cover, there wouldn't be an available Construction/Resident Engineer for this project.	The consultant's cost proposal has been reviewed by MNR and negotiations between both parties have taken place. A Supplemental Agreement will be executed and additional funding required is available	rating for the current All-Agency Contractor Evaluation (ACE) report for this project is

IEC Comment: The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Don't at Name A DA De de vel Dade Died	Current Budget: \$37.1M
Project Name: ADA - Bedford Park Blvd Station – Concourse Line	Project EAC: \$37.1M
Station - Concourse Line	Substantial Completion Date at Award: Jun 2020
Project No: T7041303	Current Substantial Completion Date: Sep 2020
Project Phase: Construction	Phase Complete: 91%

This project will achieve full ADA accessibility at Bedford Park Boulevard Station on the Concourse Line in the Bronx by installing three ADA elevators, associated equipment and modifying station elements including, columns, girders, stairs and fare arrays.

#### **Problem Since Last Quarterly Report**

**Index Trigger(s): Contingency & Schedule** 

**Contingency:** During the Second Quarter 2020, pending and approved Additional Work Orders (AWOs) exceeded the contingency of \$1.1M. The major AWOs include more than forecasted amounts of structural steel repair, cable trough work, changes to various mezzanine level stairs, and relocation of various breaker panels. Overall, \$1.7M in AWOs have been negotiated.

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion slipped by three months, from June 2020 to September 2020. This was due to delays caused by COVID -19 and Additional Work Orders (AWOs). There is an extension of time associated with AWO #4 for the rerouting of existing communication conduits inside the Elevator Machine Room. Negotiation of the time extension is ongoing. AWO cost has been settled and a retroactive directive has been issued to the contractor to proceed with the work.

#### What is Being Done

**Contingency:** These unanticipated AWOs resulted in the need for. A budget modification staff summary was requested and approved for an additional \$1M in bid contingency. Funds were available within the project budget due to a \$1M surplus identified in TA Labor for this project.

**Schedule:** An extension of time due to the COVID -19 schedule impact was granted, which extended the project Substantial Completion date to August 18, 2020. A time extension associated with AWO #4 is yet to be settled and will drive the Substantial Completion beyond September 2020.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

**All Agency Contractor Evaluation:** The Overall Contractor/Consultant performance rating for the current All-Agency Contractor Evaluation (ACE) report for this project is consistent with the IEC's observation of project performance, during this reporting period.

MTA Agency: New York City Transit	Status as of June 30, 2020	
Description ADA Computition of Control	Current Budget: \$60.7M	
Project Name: ADA Gun Hill Road Station - Dyre Ave Line	Project EAC: \$61.0M	
byte Ave Line	Substantial Completion Date at Award: Jun 2020	
Project No: T7041305	Current Substantial Completion Date: Sep 2020	
<b>Project Phase: Construction</b>	Phase Complete: 75%	

This project will achieve full ADA accessibility at Gun Hill Road station on the Dyre Avenue Line in the Bronx by installing two ADA compliant elevators and associated equipment and modifying station elements including, columns, girders, stairs and fare arrays.

#### **Problem Since Last Quarterly Report**

**Index Trigger(s): Contingency** 

**Contingency:** During the Second Quarter 2020, pending and approved Additional Work Orders (AWOs) totaled \$2.8M, in comparison to an available contingency budget of \$1.83M. This was due to unanticipated major AWOs for the reconstruction of the South Bound platform (AWO #7, \$1.1M) and the partial reconstruction of the North Bound platform (AWO #5, \$0.6M). These AWOs have no schedule impact. Additionally, AWOs #1, #2, #6, #8, #9 and #11 totaling \$100,840 were also negotiated, bring the total negotiated AWO value to date to \$1,800,840.

#### What is Being Done

**Contingency:** A budget modification in the amount of \$2.9M, which included \$1.6M in additional contingency funds, was requested and approved.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

All Agency Contractor Evaluation: The Overall Contractor/Consultant performance rating for the current All-Agency Contractor Evaluation (ACE) report for this project is consistent with the IEC's observation of project performance, during this reporting period.

MTA Agency: New York City Transit	Status as of June 30, 2020
Desired Names Challes Vendladen Die 7	Current Budget: \$9.2M
Project Name: Station Ventilators - Phase 7 - 9 Locations / Lower Manhattan	Project EAC: \$9.2M
) Locations / Lower Wannactan	Substantial Completion Date at Award: May 2016
Project No: T60412F2	Current Substantial Completion Date: Jun 2020
<b>Project Phase: Construction</b>	Phase Complete: 98%

The objective of this multi-phase project is to rehabilitate all subway ventilators and gratings rated 4.0 or worse, based on NYCT's asset condition survey. Phase 7 will rehabilitate ventilators at nine locations:

- 8th Street NYU / Broadway Line
- 28th Street / Broadway Line
- Whitehall Street / Broadway Line
- 14th Street / Broadway-7th Ave Line
- Houston Street / Broadway-7th Ave Line
- Spring Street / 8th Avenue Line
- West 4th Street / 8th Avenue Line (drain line repair/replacement)
- Park Place / Clark St Line
- 33rd Street / Lexington Ave Line

#### **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** As of the Second Quarter 2020, the forecast Substantial Completion date slipped six months over three quarters. In the Fourth Quarter of 2019, a decision was made to move two locations from Ventilator Rehabilitation Phase 14 to this phase, increasing the total number of locations from seven to nine. The additional work required a schedule extension. Stakeholders also needed time to get expended money transferred for the work originally planned to be completed in the other project. In the first and second quarters of 2020, additional schedule slippages were due to project impacts related to the COVID-19 pandemic which resulted in manpower constraints and a reduction in the availability of personnel.

#### What is Being Done

**Schedule:** Subsequent to the reporting period, Substantial Completion was achieved on June 30, 2020.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

All Agency Contractor Evaluation: An Agency ACE evaluation is not required for this project.

MTA Agency: New York City Transit	Status as of June 30, 2020
Desired Name I in the Discrete	Current Budget: \$51.5M
Project Name: Livingston Plaza - Façade Rehabilitation (Outstanding Work)	Project EAC: \$51.6M
Kenabilitation (Outstanding Work)	Substantial Completion Date at Award: Feb 2020
Project No: T6160717	Current Substantial Completion Date: Dec 2020
Project Phase: Construction	Phase Complete: 49%

This project will upgrade and repair the façade of the NYCT Livingston Plaza administrative facility and include additional perimeter protection improvements at sidewalk level.

#### **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion slipped three months, from September 2020 to December 2020, due to project shutdowns resulting from the COVID-19 pandemic.

#### What is Being Done

**Schedule:** The contractor has requested an extension of time, which is under review.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

**All Agency Contractor Evaluation:** The Overall Contractor/Consultant performance rating for the current All-Agency Contractor Evaluation (ACE) report for this project is consistent with the IEC's observation of project performance, during this reporting period.

MTA Agency: New York City Transit	Status as of June 30, 2020
Burland Name Danland 12 Tourist Florida	Current Budget: \$98.9M
Project Name: Replace 12 Traction Elevators - Broadway Line	Project EAC: \$98.9M
Divadway Line	Substantial Completion Date at Award: May 2022
Project No: T7040702	Current Substantial Completion Date: May 2022
<b>Project Phase: Construction</b>	Phase Complete: 51%

The project involves the replacement of 12 traction elevators in Manhattan at 168<sup>th</sup> Street, 181<sup>st</sup> Street and the 191<sup>st</sup> Street Stations on the Broadway Line.

#### **Problem Since Last Quarterly Report**

**Index Trigger(s): Contingency** 

**Contingency:** During the Second Quarter 2020, there were \$2.9M in approved Additional Work Orders (AWOs) compared to a \$2.9M contingency budget at 51% third party completion. The high contingency expenditure was due to AWOs for the installation of ELP1 Panels in the Elevator Machine Rooms at 191<sup>St</sup> Street, architectural changes in the lower and upper mezzanines at 191<sup>St</sup> Street, and steel repair and concrete replacement at the concrete landings at 191<sup>St</sup> Street Station.

#### What is Being Done:

**Contingency:** A Budget Modification of \$10.8M is currently in circulation. \$2.5M of which is allocated for contingency.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

**All Agency Contractor Evaluation:** The Overall Contractor/Consultant performance rating for the current All-Agency Contractor Evaluation (ACE) report for this project is consistent with the IEC's observation of project performance, during this reporting period.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Platform Components - 4 Locations – Canarsie Line	Current Budget: \$19.4M
	Project EAC: \$19.4M
	Substantial Completion Date at Award: Apr 2020
Project No: T7041251	Current Substantial Completion Date: Sep 2020
<b>Project Phase: Construction</b>	Phase Complete: 97%

This project will repair or replace platform components such as edges, columns, walls and floors at four locations on the Canarsie Line, in Brooklyn. The stations that will receive platform component rehabilitation are Morgan Ave, DeKalb Ave, Halsey St and the Bushwick Ave-Aberdeen St Stations.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion slipped by five months, from April 2020 to September 2020. This was because the required General Orders (GOs) could not be obtained and the contractor was not able to complete the remedial platform edge work at Bushwick and Morgan Ave Stations.

# What is Being Done

**Schedule:** Subsequent to the reporting period, GOs for 28 hours were obtained on August 9, 2020 and the intended remedial work was completed.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: 2018 Mainline Track Replacement - Lenox-White Plains Road Line	Current Budget: \$11.8M
	Project EAC: \$11.8M
	Substantial Completion Date at Award: Apr 2019
Project No: T7050284	Current Substantial Completion Date: Aug 2020
<b>Project Phase: Construction</b>	Phase Complete: 97%

This project involves the reconstruction of segments of mainline track on the Lenox-White Plains Road Line that have reached the end of their useful life. The track segments were determined by the latest condition survey. The scope of work includes the replacement of track and associated equipment and materials, including signals, contact rail, ballast, etc.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion date slipped four months, from April 2020 to August 2020. This was due to the impact from Covid-19 which resulted in manpower constraints and a reduction in the availability of personnel.

# What is Being Done

**Schedule:** Subsequent to the reporting period, the project achieved Substantial Completion on August 6, 2020.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: 2019 Mainline Track Replacement – Myrtle Ave Line	Current Budget: \$7.2M
	Project EAC: \$6.9M
	Substantial Completion Date at Award: Oct 2019
Project No: T7050290	Current Substantial Completion Date: Sep 2020
<b>Project Phase: Construction</b>	Phase Complete: 82%

This project involves the reconstruction of segments of mainline track on the Myrtle Ave Line that have reached the end of their useful life. The track segments were determined by the latest condition survey. The scope of work includes the replacement of track and associated equipment and materials, including signals, contact rail, ballast, etc.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion date slipped four months, from May 2020 to September 2020. This was due to the impact of Covid-19 which resulted in the limited availability of General Orders (GOs) to perform track construction in the Second Quarter of 2020.

# What is Being Done

**Schedule:** GOs for the Myrtle Avenue line are scheduled for two weekends in the first half of November 2020 to complete the panel installation and pre-final inspections at S/E - S/O Wyckoff Avenue, Track M-1.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Structural Rehab - Livonia Yard Overpass & Retaining Walls	Current Budget: \$27.1M
	Project EAC: \$27.1M
	Substantial Completion Date at Award: Jun 2021
Project No: T7070303	Current Substantial Completion Date: Dec 2021
Project Phase: Construction	Phase Complete: 30%

This project will repair concrete retaining and abutment walls and select steel and concrete at the Linden Boulevard overpass surrounding the Livonia Car Maintenance Facility in Brooklyn, which serves the Eastern Parkway Line.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the Substantial Completion slipped five months, from July 2021 to December 2021, due to steel fabrication delays and reduced work force productivity resulting from Covid-19 jobsite work rules and safety protocols.

# What is Being Done

**Schedule:** The contractor advanced work from the next phase of the project in an effort to mitigate the COVID-19 schedule impacts.

## **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Repairing 'A' and 'B' Column Base Conditions – White Plains Road	Current Budget: \$17.4M
	Project EAC: \$17.4M
	Substantial Completion Date at Award: Dec 2020
Project No: T7070344	Current Substantial Completion Date: Apr 2021
Project Phase: Construction	Phase Complete: 28%

This project will prioritize the repair of column bases, located along the White Plains Road Line elevated structure, in the borough of the Bronx.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the Substantial Completion slipped four months, from December 2020 to April 2021, due to manpower reductions associated with the Covid-19 pandemic.

# What is Being Done

**Schedule:** Infrastructure Capital Construction (ICC) is working extended weekday hours and Saturdays in an effort to mitigate the Covid-19 schedule impacts.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Upgrade Asynchronous Fiber Optic Network to (SONET) - Rings A and C	Current Budget: \$30.9M
	Project EAC: \$30.9M
	Substantial Completion Date at Award: Mar 2020
Project No: T7080602	Current Substantial Completion Date: Sep 2020
Project Phase: Construction	Phase Complete: 81%

This project will upgrade the existing fiber optic network equipment to an Asynchronous Optical Network (SONET) on the A and C Rings of the network. This project is part of a broader update of the network to be all SONET rings and the improved technology will allow for continuation of critical communication circuits in the event of a system power outage.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion date slipped three months, from June 2020 to September 2020. This was due to the impact of COVID-19. Technical experts could not travel from out of state and there was a lack of in-house support for testing.

# What is Being Done

**Schedule:** The contractor will be granted an Extension of Time due to the issues highlighted above. Weekly meetings are held with the contractor and the Electronic Maintenance division (EMD) to discuss the mitigation of delays.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Antenna Cable - Next Generation Pilot & Testing	Current Budget: \$10.9M
	Project EAC: \$10.9M
	Substantial Completion Date at Award: Jun 2020
Project No: T7080646	Current Substantial Completion Date: Sep 2020
Project Phase: Construction	Phase Complete: 81%

This project will test various next-generation radio technologies on different antenna configurations on a test track between 207<sup>th</sup> Street and Dyckman Street on the "A" Line for the purpose of upgrading and modernizing the NYCT subway radio antenna infrastructure.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the Substantial Completion slipped three months, from June 2020 to September 2020. This was due to the impact of COVID-19. Technical experts could not travel from out of state.

# What is Being Done

**Schedule:** The contractor will be granted an Extension of Time due to the issues highlighted above. Weekly meetings are held with the contractor to discuss the mitigation of delays.

## **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Purchase Various Non-Revenue Vehicles	Current Budget: \$14.4M
	Project EAC: \$14.8M
	Substantial Completion Date at Award: Jul 2021
Project No: T7130213	Current Substantial Completion Date: Apr 2022
Project Phase: Construction	Phase Complete: 1%

This project will purchase various non-revenue vehicles for NYCT use, including heavy-duty road service trucks, box trucks, high roof top vans, welding trucks, step vans and gang trucks.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the Substantial Completion slipped nine months, from July 2021 to April 2022. This was due to the COVID-19 pandemic which has effected all vehicle and parts production lines. The vehicle vendors had to shut down manufacturing plants to limit the spread of COVID-19.

# What is Being Done

**Schedule:** The vendors factories have reopened and the vendors have provided a revised schedule for Substantial Completion that factors in the COVID-19 delays. Substantial completion of the seven awarded vehicles will be complete by April 2021. The balance of vehicles are not awarded and will be advertised when the MTA lifts its hold on new capital projects. The substantial completion date for the balance of vehicles is currently under review due to the hold.

# IEC Comment

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: Long Island Rail Road	Status as of June 30, 2020
Project Name: Lynbrook Station Improvements	Current Budget: \$9.1M
	Project EAC: \$8.2M
	Substantial Completion Date at Award: Jun 2020
Project No: L70204VV	Current Substantial Completion Date: Jul 2020
Project Phase: Construction	Phase Complete: 63%

This project includes the rehabilitation of the two platform waiting rooms, windows, doors, and benches; replacement of the platform canopy and platform stair enclosures; installation of CCTV cameras; painting of the elevator towers and vestibules; and the replacement of signage at Lynbrook Station.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Contingency** 

Contingency: During the Second Quarter 2020, the Lynbrook Station Improvements project had a high Contingency Index of 1.30 due to the processing of multiple change orders. The change orders include the furnishing of benches, electrical material and canopy access panels. The benches were to be supplied by LIRR, but the change order was issued to expedite the process.

# What is Being Done

**Contingency:** Subsequent to the reporting period, two change orders were executed; change order #3, which covers the installation of access panels in the canopies and change order #4, which supplies six benches and some electrical material.

The project team is closely monitoring the work and will continue to mitigate all cost and schedule issues.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: Long Island Rail Road	Status as of June 30, 2020
Project Name: Diesel Locomotive Shop Improvements	Current Budget: \$102.3M
	Project EAC: \$102.0M
	Substantial Completion Date at Award: Mar 2020
Project No: L70601YG	Current Substantial Completion Date: Oct 2020
<b>Project Phase: Construction</b>	Phase Complete: 70%

This project includes the Design-Build Construction of the new Morris Park Locomotive Shop containing the Diesel Shop, Bone Yard, Stores Building, and Employee Facilities.

The new facility will accommodate the current and future diesel locomotive fleet. The locomotive shop will include an extensive yard consisting of fourteen turnouts, four storage tracks, four tracks that lead to the shop, and a partial future track 25. An additional track is included in the design for future expansion. The building includes office space, storage, and a locomotive shop.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion slipped five months, from May 2020 to October 2020. This was due to the design, fabrication and delivery of a diesel fire pump due to the inadequate water supply encountered at the new yard. Also impacting the schedule was a delay in shipping and manufacturing of an emergency generator, as well as impacts from COVID-19.

# What is Being Done

**Schedule:** Subsequent to the reporting period, a time extension was agreed upon on July 22, 2020 that extends the Substantial Completion date to October 2, 2020. This specific time extension does not have any impact costs, however the contractor has put the LIRR on notice that they may claim impact costs at a later date.

The project team is closely monitoring the work and will continue to mitigate all cost and schedule issues.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: Long Island Rail Road	Status as of June 30, 2020
Project Name: Substation Components	Current Budget: \$36.8M
	Project EAC: \$24.3M
	Substantial Completion Date at Award: Dec 2020
Project No: L70701XB	Current Substantial Completion Date: Feb 2022
Project Phase: Construction	Phase Complete: 15%

This project includes the replacement and upgrade of multiple components at over 100 substation locations throughout the LIRR network. This work will increase the useful life of the existing equipment and allow for a safe working environment for the performance of maintenance work. Replacing and restoring power equipment and material will meet and/or exceed the LIRR's future power demands and safety goals.

## **Problem Since Last Quarterly Report**

**Index Trigger(s): Contingency** 

Contingency: During the Second Quarter 2020, the Substations Components project had a high Contingency Index of 1.56 due to the processing of a change order. The change order was for the cost of design, manufacture and delivery of one traction power transformer at Woodhaven substation. The additional transformer at Woodhaven was added to the project scope because a failure occurred at Woodhaven requiring replacement to maintain reliable traction power on the Atlantic Branch.

# What is Being Done

**Contingency:** The change order for the traction power transformer has been executed and the schedule was not impacted.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: Metro-North Railroad	Status as of June 30, 2020
Project Name: Harlem and Hudson Power Improvements	Current Budget: \$24.8M
	Project EAC: \$22.0M
	Substantial Completion Date at Award: Jun 2021
Project No: M7050105	Current Substantial Completion Date: Jul 2021
<b>Project Phase: Construction</b>	Phase Complete: 29%

The purpose of this project is to improve the power supply capacity and resiliency of the D.C. traction power system. The project will construct a new substation near Milepost 35, between Chappaqua and Mount Kisco stations on the Harlem Line, at the "City Water" site. This substation is needed to support service resiliency in the electrified portion of the Upper Harlem Line (between North White Plains and Brewster). The new B-35 substation shall be located strategically in a weaker part of the existing power supply system, approximately half-way between two existing substations (B-32 at Milepost 32.2 and B-36 at Milepost 36.6), providing improved resiliency and redundancy by allowing two segments to be "bridged" in case of a substation failure. In addition, the new substation will have proper pumps and pits, and critical equipment elevated where possible, to improve resiliency to flash flood conditions.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Contingency** 

**Contingency:** During the Second Quarter 2020, the City Water Substation project had a High Contingency Index due to the need for contractor to install the pole lines and cables to the City Water substation. The original design intended to have the MNR Power Department do the installation, but after the construction contract was awarded, the MNR Power Department was not able to install the pole lines due to a work force shortage. The associated funds were transferred to project contingency and a change order was negotiated with the contractor to install the pole lines.

# What is Being Done

**Contingency:** A change order has been executed for the additional work identified above. The funding required is available from within the existing project contingency.

## **IEC Comment**

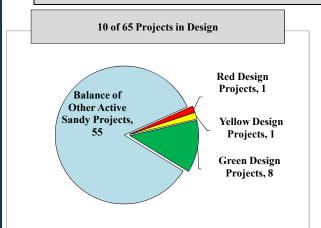

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

# 2<sup>nd</sup> Quarter 2020 Traffic Light Report on MTA SANDY Program

## A total of 65 Active Sandy Projects were Reviewed for the 2<sup>nd</sup> Quarter 2020

The 65 active projects include 10 projects in Design, 11 in Post-Design to Construction Award, 44 in Construction

Red "Post Des to Const
Awd" Projects, 8

Balance of Other Active Sandy Projects, 54

Yellow "Post Des to Const Awd" Projects, 3

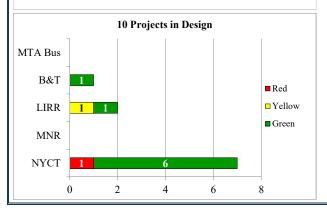

Balance of Other
Active Sandy
Projects, 21

Red Const
Projects, 3

Yellow Const
Projects, 13

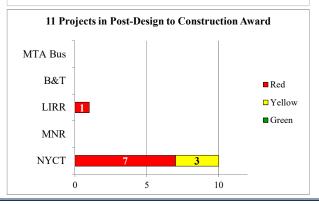

Summary of Projects in Design: 10 projects were reviewed in this phase with 8 (80%) designated Green, 1 (10%) Yellow, and 1 (10%) Red. The Red project was for a schedule variance due to the need to revise the specifications in order to reach an agreement with a prospective contractor.

**Last Quarter:** : 8 projects were reviewed in this phase with 6 (75%) designated Green and 2 (25%) were Yellow.

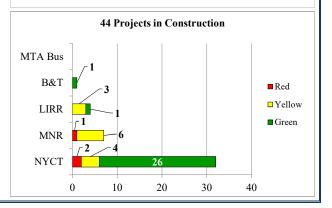

Summary of Projects in Post-Design to Construction Award: 11 projects were reviewed in this phase with 8 (73%) designated Red and 3 (27%) Yellow. All 8 Red projects were for schedule variances due in part to the Covid-19 procurement moratorium and time needed to review project design options and resolve the real estate acquisition/easement.

**Last Quarter:** 11 projects were reviewed in this phase with 6 (55%) designated Green, 4 (36%) Yellow and 1 (9%) Red.

Summary of Projects in Construction: 44 projects were reviewed in this phase with 28 (64%) designated green, 13 (29%) Yellow, and 3 (7%) Red. All 3 Red projects were for schedule variances due in part to the Covid-19 pandemic affecting manpower availability and the supply chain, along with unforeseen site conditions.

Last Quarter: 46 projects were reviewed in this phase with 32 (70%) designated green, 11 (24%) Yellow, and 3 (6%) Red.

# **MTA Sandy Recovery Projects Terms and Definitions**

# 2<sup>nd</sup> Quarter 2020 Traffic Light Report

The following Terms and Definitions used to identify a project's Traffic Light color designation show variances from quarter to quarter and are based on three performance indicators: cost, contingency and schedule. A project is designated a "red light project" when one or more of the three indicators exceed a specified threshold. Agencies are required to produce follow-up variance reports for all qualified red light projects. Included in these reports are agency summaries (on pink paper stock) of issues associated with each project showing a red indicator and how the issues are being resolved. A project is designated a "yellow light project" after one or more performance indicators had triggered a red in a previous quarter. A yellow project may revert back to green after four consecutive quarters if the performance indicators have not worsened. A project is designated a "green light project" when no performance indicator has exceeded the Traffic Light Reports specified thresholds.

# Sandy Recovery Traffic Light Report Project Terms and Definitions

# Projects in Design: 10 Green: Indices less than 110% and index movement less than 10% Red: Cost Index: An EAC increase of 10% (or index movement of 10% or more since last Traffic Light Report) Red: Schedule Variance: An increase of 3 months or more to substantial completion or since last Traffic Light Report Yellow: Previously indicated as red with no new substantial change since last Traffic Light Report / A project in design that has been designated Yellow may be returned to Green when it has been in compliance with the three performance indicators for (four

# **Projects in Post Design to Construction Award Phase: 11**

- Green: Phase Duration less than either the default of 128 calendar days for all agencies or the agency entered duration.

  Red: Phase Duration is greater than either the default 128 calendar days or the agency
- entered duration.

  Vallow: Proviously indicated as red with no new substantial change since last Traffic
- Yellow: Previously indicated as **red** with no new substantial change since last Traffic Light Report.

# **Projects in Construction: 44**

consecutive quarters) one year.

- Green: Indices less than 110% and index movement less than 10%
  Other indices not exceeding those criteria specified in index formulas and criteria.
- Red: Cost or Contingency Index: An increase of 10% (or index movement of 10% more since last Traffic Light Report)
- Red: Schedule Variance: An increase of 3 months or more to substantial completion or since last Traffic Light Report
- Yellow: Previously indicated as **red** with no new substantial change since last Traffic Light Report / A project in construction that has been designated Yellow may be returned to Green when it has been in compliance with the three performance indicators for (four consecutive quarters) one year.

# **Projects in Planning:**

Projects in Planning are reviewed but not displayed in the TLR until the project reaches the design phase.

# **Projects in Planning:**

Projects that were completed in previous quarters are not displayed in the current quarter's TLR, but continue to be maintained in the TLR project database for reporting purposes on the overall Sandy Program.

#### **Report Index Formulas and Criteria:**

- Cost Variance = EAC / Current Project Budget Amount (Note: Current Budget is not Budget at Award)
- ➤ Cost Contingency Index = % Contingency Spent/% 3<sup>rd</sup> Party Contract Completion
  - Contingency used includes expended & pending AWOs.
  - Prompted when project has reached 25% completion or higher.
- Schedule Variance = Number of months of change in schedule since last Traffic Light Report
- Projects with current budgets below \$7M are not displayed in the current quarter's Sandy TLR, but will continue to be maintained in the TLR database for reporting purposes on the overall Sandy Program. If the current budget increases above the \$7M minimum threshold, the projects will return to an active status.

	NYCT - New York City Transit							
ET060317	Mitigation: Conversion of 2 Pump Trains	Schedule	\$19.1M	S 2020	completion date slipped four months, from May 2020 to September 2020. The schedule slip was due to ongoing perophisicions with a prospective contractor in order to reach a	departments, to come to an agreement regarding the	An Agency ACE evaluation is not required for this project	

IEC Comment: The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
D'AN DA CELC'I	Current Budget: \$8.1M, \$10.0M, \$44.7M
Project Name: Restoration of Track, Signals, and Power / Communication Cables - Rutgers	Project EAC: \$13.8M, \$11.3M, \$37.21M
Tube	Original Award Date: May 2014
Project No: ET050210, ET080213, ET090219	Current Award Date: Sep 2020
Project Phase: Post-Design to Construction Award	Phase Complete: 0%

This project will repair Superstorm Sandy damage to several critical assets in the Rutgers Tube that serves the 6<sup>th</sup> Avenue Line, including track and its associated equipment (rails, plates and spikes, ties and tie blocks), signal equipment power cables and communication cables.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted award date slipped three months, from June 2020 to September 2020. This was due to the MTA's 60 day procurement hold put in place because of COVID-19 impacts. The procurement hold delayed the administrative review and vetting of proposals required prior to award of the construction contract.

# What is Being Done

**Schedule:** Subsequent to this reporting period, the project was awarded on July 28, 2020.

## **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Mitigation Street Level	Current Budget: \$57.0M
	Project EAC: \$60.2M
Openings at 7 Stations	Original Award Date: Mar 2020
Project No: ET040328	Current Award Date: Sep 2020
<b>Project Phase: Construction</b>	Phase Complete: 78%

This project will construct long term flood protection solutions such as mechanical closure devices (MCDs), watertight manhole lids, flood doors, flex gates and conduit sealing at nine stations and one fan plant in Brooklyn and Queens. The locations are Flushing Ave, Broadway, Metropolitan Ave, Nassau Ave, 21<sup>st</sup> Street-Court Square, Lorimer Street, Vernon Boulevard-Jackson Ave and 23<sup>rd</sup> Street-Ely Ave stations and the Richardson Street Fan Plant.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion date slipped five months, from April 2020 to September 2020. This was due to issues related to the COVID-19 pandemic. The progress of contractual work has been obstructed, including manufacturers and their labor force impacted due to positive testing of its employees, reducing available workers and slowing production of MCDs and ladders. Additionally, the supply chain has been impacted by delayed deliveries consequently pushing the Substantial Completion date to September 2020.

# What is Being Done

**Schedule:** The forecast installation of MCDs and ladders in August and September includes:

34 MCD units are to be delivered, 12 MCD units weekly.

A total of 51 MCDs and 30 ladders are to be installed.

## **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Desired Name Military A. Fare Diagram	Current Budget: \$34.6M
Project Name: Mitigation - 4 Fan Plants	Project EAC: \$34.6M
	Original Substantial Date: Apr 2020
Project No: ET060321	Current Substantial Date: Nov 2020
<b>Project Phase: Construction</b>	Phase Complete: 86%

This project will provide long term flood protection to above grade Fan Plants that have been deemed vulnerable to coastal storm flooding with solutions such as fortified walls, slabs and flood doors. The Fan Plants are Whitehall Street/Montague Tube (#5104), North 7<sup>th</sup> St/Canarsie Tube (#5110), Front St Shaft/Cranberry Tube (#6330) and Nott Ave Shaft/53<sup>rd</sup> St Tube (#6404).

## **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Substantial Completion date slipped six months, from May 2020 to November 2020. This was due to an encountered subsurface condition at Fan Plant 6404, which uncovered weak soil zones and unclean fill as well as differing field conditions in relation to the existing foundation. The field conditions required a redesign of the foundation protection method. The original contractual method of Jet grouting is unfeasible with these unforeseen conditions. The redesigned method will replace the interior slab of the ground floor of Fan Plant 6404 with a fortified slab, able to withstand the uplift load of the building.

# What is Being Done

**Schedule:** A new design was developed and implemented to protect the facility. The design was approved and was selected based on meeting the intent of the protection, efficiency, cost and time. The contractor is working extended shifts and weekends to reduce the time impact.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Recovery - Wrap-up Rockaway Line	Current Budget: \$47.1M
	Project EAC: \$56.4M
Line	Original Award Date: Mar 2020
Project No: ET070209	Current Award Date: Oct 2020
Project Phase: Post-Design to Construction Award	Phase Complete: 0%

This project will provide remaining repairs to Superstorm Sandy damage that occurred along the Rockaway Line. Work will include structural repairs on the North Channel Bridge, cable replacement between Howard Beach Station and Hammels Wye, replacement of signal switch heaters at Rockaway Park Yard and replacement of signal cables at various locations along the line.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted award date slipped five months, from May 2020 to October 2020. This was due to the bid opening being delayed and having been put on hold due to COVID-19 impacts.

# What is Being Done

**Schedule:** Project is on hold until administrative review has determined that the COVID-19 situation is safe enough to allow for the start of new construction projects.

#### IEC Comment

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
D 4 N M	Current Budget: \$10.2M
Project Name: Mitigation - Montague-Furman Substation on the Broadway Line	Project EAC: \$11.4M
Substation on the Broadway Line	Original Award Date: May 2020
Project No: ET090304	Current Award Date: Oct 2020
Project Phase: Post-Design to Construction Award	Phase Complete: 0%

This project will provide Superstorm Sandy repair and flooding resiliency work at the Montague-Furman Substation, which serves the Broadway Line. Work includes replacement of high tension switchgear, installation of watertight manhole covers, and sealing of ducts.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted award date slipped three months, from July 2020 to October 2020. This was due to the MTA's 60 day procurement hold due to COVID-19 impacts. The procurement hold delayed administrative review and vetting of proposals required prior to award of the construction contract

# **What is Being Done**

**Schedule:** The project is waiting for the MTA to lift the hold on Award.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020				
Decided Name of Casala Mithal Casala Decide and	Current Budget: \$16.9M				
Project Name: Sandy Mitigation - Back-up Power Control Center	Project EAC: \$15.9M				
Tower control center	Original Award Date: Sep 2019				
Project No: ET090310	Current Award Date: Feb 2021				
Project Phase: Post-Design to Construction	Phase Complete: 98%				
Award	Thase complete. 5070				

This project will design and build a new back-up Emergency Power Control Center (EPCC), to be located at Jay Street Substation, to ensure that the EPCC can seamlessly operate as the Power Control Center (PCC) in the event that the main PCC at 53<sup>rd</sup> Street, Manhattan is not functional or inaccessible.

The main scope of work includes furnishing and installing a new Supervisory Control and Data Acquisition (SCADA) system for the EPCC that is capable of seamless integration with the existing SCADA master software at the PCC which is currently in service.

This project will connect the sixteen zone control rooms for the BMT Division at the EPCC so that the EPCC is operational for the BMT Division. The Design-Build contractor shall perform the work so that MTA can later connect the IRT and IND Divisions to the EPCC.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted award date slipped three months, from November 2020 to February 2021. This was due to the Step 1 Request for Qualifications, (RFQ) advertisement for this contract being placed on-hold under MTA's procurement moratorium as a result of COVID 19 pandemic impacts.

#### What is Being Done

**Schedule:** While awaiting the lifting of the procurement moratorium in order to advertise Step 1 RFQ, the design team continues to revise the Step 2 Request for Proposal (RFP) documents such as the Project Requirement Design Criteria (PRDC) and Division 1 Specifications in coordination with MTA C&D Contracts.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: New York City Transit	Status as of June 30, 2020
Project Name: Mitigation - Consolidated Revenue Facility	Current Budget: \$15.0M
	Project EAC: \$26.8M
	Original Award Date: Jul 2018
Project No: ET160310	Current Award Date: Oct 2020
Project Phase: Post-Design to Construction Award	Phase Complete: 0%

This project will provide an effective flood mitigation scheme to protect the Consolidated Revenue Facility located in Maspeth, Queens. The project will design and implement flood mitigation/resiliency measures against a Federal Emergency Management Agency (FEMA) +2 feet flood event: including construction of a new perimeter flood barrier/wall at the property line, installation of stop logs at all access openings (stored within the facility), improving drainage and pumping and restoration of the Newtown Creek bank that includes armor with sheeting.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted award date slipped four months from June 2020 to October 2020. This was due to additional time needed to review additional project design options after it became clear in the bidding process that the chosen design option was incompatible with the budget.

# What is Being Done

**Schedule:** Project is currently with the legal and specification groups for review. Once the initial review is completed, the project will receive the Authorization to Advertise (ATA). Subsequent to this reporting period, award has been reforecasted for December 2020.

#### **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: Long Island Rail Road	Status as of June 30, 2020
Project Name: Long Island City Yard Resiliency	Current Budget: \$26.3M
	Project EAC: \$26.3M
	Original Award Date: Mar 2019
Project No: EL0603ZS	Current Award Date: Mar 2021
Project Phase: Post-Design to Construction Award	Phase Complete: 10%

This project includes the construction of a flood wall, flood gates, the installation of permanent pump stations and the relocation of utility poles around the perimeter of the yard. In addition, the project scope includes the installation and electrification of tracks 11 and 12 and new yard lighting.

# **Problem Since Last Quarterly Report**

**Index Trigger(s): Schedule** 

**Schedule:** During the Second Quarter 2020, the forecasted Award Date slipped five months, from October 2020 to March 2021. This was to allow more time to resolve the real estate acquisition/easement requirements for the project.

# What is Being Done

**Schedule:** The project requires easements from the New York Department of Transportation (NYCDOT) and the Triborough Bridge and Tunnel Authority (TBTA) and the purchase of a piece of land from a privately owned parking lot. MTA Real Estate has completed negotiations and the final agreements are nearing completion.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

MTA Agency: Metro-North Railroad	Status as of June 30, 2020
Project Name: Recovery - Right of Way Restoration at Various Locations	Current Budget: \$8.0M
	Project EAC: \$8.0M
	Substantial Completion Date at Award: Sep 2015
Project No: EM030202	Current Substantial Completion Date: Oct 2020
<b>Project Phase: Construction</b>	Phase Complete: 95%

Superstorm Sandy generated strong winds and severe storm surge/flooding which damaged and downed trees affecting the Right-Of-Way (ROW), critical infrastructure, and significant Hudson River shoreline erosion over more than half of the 60 plus mile Hudson Line. Although trees that fell directly onto the ROW were initially removed, work remained along the wooded ROW of the Hudson, as well as the Harlem and New Haven lines. Damaged trees were identified and removed in all locations. This work ensured that the critical infrastructure of the railroad remained unobstructed and that service would not be impacted. The tree removal required track outages and coordination with other projects to take advantage of track outage opportunities to maximize efficiencies.

# **Problem Since Last Quarterly Report**

## **Index Trigger(s): Schedule**

**Schedule:** During the Second Quarter 2020, the forecast Substantial Completion date slipped three months, from July 2020 to October 2020 due to the work slowdown during the COVID-19 pandemic.

Impacts of COVID-19 on this project are as follows:

- 1. Lack of Track Department labor forces due to 50% availability during the second quarter.
- 2. No Track outages due to the lack of Power Department 3<sup>rd</sup> rail support.
- 3. No forces available to operate equipment to place rip-rap on the shoreline.
- 4. Rip-rap material delivery was also impacted.

# **What is Being Done**

**Schedule:** The rip-rap program will continue during the Third Quarter 2020 for areas between Phillipse Manor, Scarborough and Cortlandt stations. The project is actively and closely monitoring the COVID-19 situation and working with the Track and Power departments to improve coordination for better support.

# **IEC Comment**

**Budget and Schedule Performance:** The IEC substantially agrees with the material presented in this report, including the stated problems and actions taken by the Agency.

# Projects in CPOC's Risk-Based Monitoring Program (2<sup>nd</sup> Quarter 2020 Traffic Light Report – Period Ending June 30, 2020)

The following projects in CPOC's Risk-based Monitoring Program are currently reported on by the responsible MTA Business Unit in accordance with the CPOC Work Plan schedule, and are continually monitored by the Independent Engineering Consultant. Monitored Capital Program projects are not included in the Quarterly Capital Traffic Light Report. Monitored Sandy Program projects are included in the Quarterly Sandy Traffic Light Report. The program/project list is subject to periodic review and adjustment by the MTA.

# Projects in CPOC's Risk-Based Monitoring Program

# September 2020 Independent Engineering Consultant Project Review

Summary of IEC Stations and ADA Programs Second Quarter 2020 Traffic Light Reports

# Summary of the Stations Program

- This quarter the IEC reviewed 70 active, cross-agency, stations projects featured in the Core TLR, for Cost, Contingency and Schedule Performance.
- 12 Station projects triggered a variance this quarter, indicated by a RED Traffic Light. 7 of the projects had schedule slippages, 4 high contingency expenditures and 1 had both issues.
- The station projects that were RED were negatively impacted by unforeseen field conditions, multiple change orders, limited site access, scope additions, reduced staffing availability and more significantly revisions to design documents to address project bundling and design-build integration requirements.
- The problems encountered this quarter primarily affected schedules. The majority of the schedule issues are historically typical of the schedule problems encountered in prior quarters by both the Stations Program and other construction projects in the Core TLR. However, this quarter, revisions to design documents and the impact of Covid-19 job-site restrictions, modified work rules, safety precautions, enhanced cleaning procedures and social distancing requirements, compounded this quarter's negative reporting results.
- 2 of the 12 variance reports describe Covid-19 related schedule delays and 6 of the 12 reports mention architectural changes and modifications to design-build documents. The Variance Reports, which start on page 30 in the CPOC book, provide project descriptions and summarize corrective actions undertaken to mitigate the problems.
- Moving forward, C&D Stations is focused on a number of project delivery methods that are intended to improve project performance. Incorporating lessons learned, undertaking more invasive field testing, implementing more thorough site inspections early in the pre-design process, bundling projects to take advantage of track access, coordinating GO's and piggybacking opportunities, are all intended to reduce the typical budget and schedule performance variances typically seen in quarterly TLR reports from construction projects in the Stations Program.

# Summary of the ADA Program

- On page 20 of the CPOC book, projects in NYCT's ADA Accessibility Program are featured on the first page of this quarter's Core TLR.
- 15 ADA projects that are currently in construction are represented in the 2<sup>nd</sup> Quarter 2020 Core TLR.
  - 2 projects triggered a performance variance this quarter, 1 for high contingency expenditure and 1 having both contingency and schedule variances.
  - The contingency issues were related to multiple change orders which addressed unforeseen field conditions and additional repair work. 1 project was impacted by Covid-19 related issues.
  - Budget modifications to replenish contingency shortfalls were anticipated for both projects. Time extensions have been requested to address the schedule delays related to Covid-19.
- The ADA projects monitored in this quarter's Core TLR have been impacted by the same general issues that have affected other construction projects underway during the Covid-19 pandemic. The majority of schedule impacts cannot be mitigated and have been addressed by granting time extensions to the contracts. The IEC notes that no active ADA project in construction this quarter has reported any problems with the elevator manufacturers, subcontractors, quality or the fabrication and delivery supply chains.
- The 3<sup>rd</sup> Quarter 2020 Core TLR will incorporate IEC Risk-Based monitored projects which have been monitored separately.

# Second Quarter 2020 TLR Summary

Summary of the 2<sup>nd</sup> Quarter 2020 Core and Sandy Traffic Light Report Findings:

The  $2^{nd}$  Quarter 2020 Core TLR can be found on page 17 of the CPOC book and the  $2^{nd}$  Quarter Sandy TLR can be found on page 49 of the CPOC book.

# □ A total of 295 projects were reviewed in both TLR reports

34 in Design

11 in Post-Design to Construction

250 in Construction.

# Of these:

178 (60%) were designated Green

78 (26%) were designated Yellow

39 (13%) were designated Rec

Of the 39 RED Core and Sandy projects which have triggered a Key Performance Indicator in the  $2^{nd}$  Quarter; 32 were for Schedule, 6 for Contingency and 1 triggered both Schedule and Contingency Variances.

For each of the Core and Sandy projects designated Red in the 2<sup>nd</sup> Quarter, the agencies prepared a variance report stating the problems and corrective actions taken.

# Second Quarter TLR Findings

- While Covid-19 has impacted the MTAs recent project performance and delayed the award of many construction contracts, as reflected by projects represented in both 2<sup>nd</sup> Quarter 2020 TLR's, it is the strict adherence to Covid-19 safety protocols, regulations and work rules that have enabled the MTA to continue vital regional transportation improvements, maintain service and keep construction work sites operational and safe for employees, contractors and the riding public during the past 2 quarters.
- □ This quarter, the leading performance trigger affecting the <u>Core Program</u> was overwhelmingly schedule, impacting 74% (20 of 27) of the projects. In addition, 48% (13 of 27) of the project delays were directly related to the impacts from Covid-19.
- Similar findings are also evident in the <u>Sandy Program</u> where the leading performance indicator was overwhelmingly schedule, impacting 100% (12 of 12) of the projects. Also 66% (8 of 12) of project delays were directly related to the impacts from Covid-19.
- The project impacts include; manufacturers temporarily closing their facilities, decreased production, deliveries and compromised material supply chains, reduction of the contractors work forces due to the positive testing of employees, reduction of MTA's labor force, on-site support capabilities and productivity, limited track outage availability and the MTA's 60 day Covid procurement moratorium which delayed project advertising, bid openings and awards.
- In summary, this quarter 54% (21 of 39) of the projects which triggered a RED and are featured in the Core and Sandy TLR's were negatively affected by Covid-19 related issues. This is a noticeable increase of projects impacted by Covid-19 in comparison to the 1st Quarter 2020 reporting when 21% (6 of 28) of RED projects (4 Core and 2 Sandy) were negatively affected. (See page 6 for a list of TLR projects impacted this quarter by Covid-19).

# List of Covid-19 Impacted Projects

21 TLR project IDs/ACEPs reporting Covid-19 impacts in the Second Quarter of 2020

# □ CORETLR:

- 1. T6160717 Livingston Plaza Façade Repairs
- 2. T7041303 ADA Bedford Park Blvd Station
- 3. T7050284 2018 Mainline Track Replacement Lenox WPR Line
- 4. T7050290 2019 Mainline Track Replacement Myrtle Ave Line
- 5. T7070303 Structural Rehab Livonia Yard Overpass & Walls
- 6. T7070344 Repairing A and B Column Base Conditions WPR
- 7. T7080602 Upgrade Async Network to SONET Rings A and C
- 8. T7080646 Antenna Cable Next Generation Pilot Test
- 9. T7130213 Purchase of Various Non-Revenue Vehicles
- 10. T60412F2 Ventilator Repairs Phase 7
- 11. T7130208 Purchase of Twelve 3 Ton Crane Cars
- 12. T7160727 Roof Replacement Tiffany Central Warehouse
- 13. L70601YG Diesel Locomotive Shop Improvements

## SANDY TLR:

- 1. ET040328 Mitigation Street Level Openings at 9 Stations
- 2. ET050210 Recovery Mainline Track Rutgers Tube
- 3. ET080213 Recovery Signals Rutgers Tube
- 4. ET090219 Recovery Power & Communication Cables Rutgers Tube
- 5. ET070209 Recovery Wrap-Up Rockaway Line
- 6. ET090304 Mitigation Montague Substation Brdwy Line
- 7. ET090310 Mitigation Back-Up Power Control Center
